PROJECTS

Foodzilla — Food Ordering Web Application

Tech Stack: React.js, JavaScript, Tailwind CSS, React Router, Parcel

- Engineered a Swiggy-inspired food-ordering platform in React.js, delivering a fast, responsive browsing and ordering experience
- Architected 15+ reusable functional components with React Hooks (useState, useEffect) for scalable, maintainable state management
- Integrated live restaurant and menu APIs to render dynamic, real-time content across the application
- Implemented multi-page client-side navigation with React Router, enabling seamless transitions between restaurant and menu views
- Crafted a fully responsive, mobile-first UI with Tailwind CSS, improving usability across devices

Movie Search App (React.js)

June 2025 – Sept 2025

Tech Stack: React.js, TMDB API, Framer Motion, CSS3

- Built a real-time movie search engine powered by the TMDB API, delivering instant, accurate search results
- Enhanced user experience with fluid UI animations and hover interactions using Framer Motion
- Designed a responsive, modern grid layout with graceful loading and error-state handling for a polished feel

Personal Portfolio Website

Jan 2024 – March 2024

Tech Stack: HTML5, CSS3

- Designed and developed a fully responsive personal portfolio website from scratch using pure HTML5 and CSS3
- Built a clean, modern layout with Flexbox and precise CSS positioning for cross-device consistency
- Showcased projects, technical skills, and contact details in an organized, recruiter-friendly format
